

WATER RESISTANT ELECTRICAL BOX

ABSTRACT OF THE INVENTION:

A water resistant electrical floor box includes a base, side walls, an open face defining an interior portion. The interior portion is divided into a receptacle interior and a drainage interior portion with a dividing wall. Substantially covering the open face is a cover assembly. The cover assembly includes a flange, and a cover pivotally attached thereto. The cover includes a pivotal door thereon to allow wires to exit. In addition, the box further includes a cover assembly with a channel to direct the water away from the receptacle interior portion.
